

PLM Teamcenter Consultant - Services Division

We are recruiting for the position of Teamcenter PLM consultant as part of our continued growth. Our success is based on our proven ability to help resolve engineering challenges, automate processes and manage data more efficiently using Siemens PLM technology. Since 2006, we've won many UK business awards for our customer service and support. Guided by a highly respected and technically astute management team, we pride ourselves on our technical knowledge, industry expertise, and our long partnership with Siemens PLM Software. Our highly successful technical team is expanding and we have an exciting opportunity for an experienced PLM Teamcenter consultant to become a part of our PLM team.

Responsibilities of the role include:

- Delivery of PLM project deployment workshops
- PLM project scoping and technical writing of statement of works
- Implementation and support of
 - Teamcenter Unified Architecture PLM Software installation, configuration and monitoring
 - Teamcenter 2-Tier and 4-Tier systems
 - Teamcenter software patches and upgrade
 - Basic BMIDE configuration
 - Basic export/import tasks using PLMXML, IPS Data Upload
 - Teamcenter CAD integrations including: NX, Solid Edge, Creo, Catia, Inventor and AutoCAD
 - Teamcenter CAE integrations including: NX, Ansys
 - Teamcenter CAM integrations including: NX, MRL, DNC
 - Teamcenter MSOffice including Outlook Integration
 - Teamcenter Group & Role Management, maintenance & security including LDAP Integration
 - Teamcenter Access Control and workflows templates
 - Teamcenter Change Management
 - Provide training courses to new and existing customers as part of their software upgrades
- Develop best practice and documentation for consistency, improvements and standard methods.
- Working with a mixture of data management issues and the related IT systems.

The successful applicant:

- Experienced Teamcenter System Administrator.
- Advanced knowledge of IT hardware and operating systems
- Experience with applications in a multi-OS environment (UNIX and/or Windows).
- Application configuration control and deployment practices
- Experience of NX, I-deas, Pro-E would be beneficial but not essential.
- System & business process modelling techniques
- Basic scripting and/or programming
- Authoring and maintain system and user documentation
- Required to travel to onsite working locations throughout the UK.
- Good communication skills, both interpersonal and telephone.
- Team player, calm under pressure, reliable
- Full clean driving license
